

**Amendments to the Claims**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently amended) A compound of the general formula I:

or pharmaceutically acceptable salt thereof, wherein V is a non-peptidic vector having affinity for the Angiotensin II receptor and is selected from Losartan, Valsartan, Candesartan, Eprosartan or derivatives thereof, L is a bond, a spacer or a linker moiety, and Z represents a chelating agent of Formula II carrying an imageable moiety of a metallic radionuclide M

(II)

where:

each R<sup>1</sup>, R<sup>2</sup>, R<sup>3</sup> and R<sup>4</sup> is independently an R group;

each R group is independently H or C<sub>1-10</sub> alkyl, C<sub>3-10</sub> alkylaryl, C<sub>2-10</sub> alkoxyalkyl, C<sub>1-10</sub> hydroxyalkyl, C<sub>1-10</sub> alkylamine, C<sub>1-10</sub> fluoroalkyl, or 2 or more R groups, together with the atoms to which they are attached form a carbocyclic, heterocyclic, saturated or unsaturated ring.

A moiety detectable in an in vivo imaging procedure of a human or animal body.

2. (Cancelled)

3. (Cancelled)

4. (Previously presented) A compound as claimed in claim 1, where Z is a chelating agent of formula e carrying an imageable moiety M

5. (Cancelled)

6. (Cancelled)

7. (Original) A pharmaceutical composition comprising an effective amount of a compound of general Formula (I) or a salt thereof, together with one or more pharmaceutically acceptable adjuvants, excipients or diluents for use in enhancing image contrast in *in vivo* imaging or for treatment of a disease.

8. (Cancelled)

9. (Previously presented) A method of generating images of a human or animal body involving administering a contrast agent to said body, and generating an image of at least a part of said body to which said contrast agent has distributed, characterised in that said contrast agent comprises a compound as claimed in claim 1.

10. (Previously presented) A method of generating enhanced images of a human or animal body previously administered with a contrast agent composition comprising a compound as claimed in claim 1, which method comprises generating an image of at least part of said body.

11. (New) A compound as claimed in claim 1, wherein M comprises  $^{67}\text{Ga}$ ,  $^{111}\text{In}$ ,  $^{81\text{m}}\text{Kr}$ ,  $^{99}\text{Mo}$ ,  $^{99\text{m}}\text{Tc}$  and  $^{201}\text{Tl}$ .
